

ABSTRACT

CV. Athala Lautan Mulia is a company which operates in the field of supplying security equipment for mining in the city of Palembang. This company is under the leadership of Mr. Hendri Kurniawan. This company is located on Jl. Ampibi Near Sekip Ujung Market No.1974, Kec. Kemuning, Palembang City, South Sumatra 30127. At CV. Athala Lautan Mulia the storage of goods data, reports and transactions is still done manually so there is a risk of data loss. Therefore, a web-based sales system application was created to help companies manage data. The application was built using the RAD (Rapid Application Development) method and the problem analysis used PIECES analysis. The design and implementation of this web-based sales system application is expected to help companies store and manage data.
