

ABSTRACT

DECISION SUPPORT SYSTEM GRANTING BONUS END OF THE YEAR TO THE COOPERATIVE BHAKTI WORKING MEMBERS USING TSUKAMOTO METHOD

Savings is a savings plan in the form of money, both in cooperatives and other banks. Everyone has a plan in his life so as not to become a burden in the future plan. Cooperatives are small banks that can help small communities in helping plan by saving. Saved savings can be taken by lending to the cooperative. From each cooperative has its own goals, as in Karya Bhakti cooperative which has the purpose of helping the community in saving and trying and giving bonus at the end of the year. To be more consistent in helping the cooperative to provide bonuses to members of the cooperative then used the method of Tsukamoto to assist in determining the amount of bonus that will be given.
