

ABSTRACT

The registration process of Job Training and Thesis Proposal is a process that students will pass as a condition to obtain a Bachelor's degree. Musi Charitas Catholic University requires its students to take this process so that the Job Training and Thesis Proposal activities can run well and smoothly.

Registration Procedure Job Training and Thesis Proposal at Musi Charitas Catholic University has been arranged to accommodate all the interests and completeness of data for both enrolling students and lecturers who process and review the data. But in the implementation in the field, the authors still see some problems, so the authors want to analyze this procedure using PIECES techniques and build Job Training and Thesis Proposal Registration Website as one solution that the authors offer to address the problems found.

Through this research, the authors conclude that the registration process of Practice Work and Thesis Proposal at Musi Charitas Catholic University can be developed with the website that the author made. It is expected to assist students and lecturers in the implementation of the Job Training Practices and Thesis Proposal Procedures at the Catholic University of Musi Charitas.
