ABSTRACT

Business processes within a company must have transactions, both sales and purchase transactions. In the transaction involves goods or services traded. Similarly, what happens in the company CV Central Computer engaged in the sale and repair of computer equipment, laptops and printers.

In CV Central Computer Palembang, Warehouse Staff responsible for taking care of goods and data archive. The warehouse staff will check the stock of goods, archive the inventory data, and make the goods report. In processing the entry and exit of goods, staff will record every transaction entry and exit of goods in the book stock of goods. But in the processing of transactions often occur data errors due to data archiving is less neat.

To overcome these problems made the design of goods stock system in CV Central Computer Palembang in the future can diimplemtasikan to facilitate warehouse staff to prepare monthly and daily reports.

Keywords: CV Central Computer, Stock, data archive, transaction.
