

ABSTRACT

Education is an important investment that parents can do for their future young generation which is the future of the nation. Recognizing that era of intense competition and globalization in the future requires a generation of qualified and competitive. That's why a place that is able to provide the best educational facilities for the next generation is needed. Palembang International School is designed internationally, which can provide preparation for the global competition, which is able to accommodate all the activities in it, so it can be useful for the advancement of education in Palembang. Palembang International School has facilities in separate building such as halls building, library building, sports building, the main building (classes), office building, food court and mini market building.

Keywords: education, quality, Palembang.
