

ABSTRACT

Vocational secondary school (SMK) Xaverius is the only vocational school that was established by the Foundation for Xaverius. SMK Xaverius Palembang has several department of the duties and authorities, such as department of the monitoring the laboratory computers. department of laboratory computers is responsible for managing any problems in laboratory computers including monitoring student while they were studying in the laboratory computer that is in SMK Xaverius. Previously, to do all that process must be done manually. One way to resolve that problem is by use the application, that name is Radmin 3.4. This application can monitor directly with just one computer user, so it can use the time effectively and efficiently monitor the students directly. Application implementation, Radmin 3.4 are expected to help the school in computer monitor pupils in the learning process.
