

ABSTRACT

PT. Truba Jaya Engginering is a state-owned company engaged in natural resources such as the construction of power plants, oil and gas plants, cement, pulp and paper factories, mining and civil works processing plants. Warehouse Division is responsible for goods management and loaning of goods, Wirehouse has several work units one of which is Admin work unit. Admin is responsible for managing, including managing the borrowing of heavy equipment. In lending heavy equipment is still done by asking directly to the Wirehouse officer without any mechanism for recording the number of heavy equipment computerized from the admin as a result of searching for the tools needed long, and the number of tools needed is uncertain. To overcome this problem an analysis of the application of heavy equipment borrowing at Wirehouse PT. Truba Jaya Engginering to make it easy for admin staff to know the amount of heavy equipment inventory.

Keywords: *PT. Truba Jaya Engineering, Warehouse, admin, borrowing heavy equipment.*
