

ABSTRACT

Melisa, Effect of Leadership Style and Quality Of Management Information On Managerial Performance (under the guidance of Mrs. Mutiara Maimunah, S.E., M.Si., Ak.).

This study aims to examine and obtain evidence of the influence of leadership style and quality of management information on managerial performance. Research conducted on managers of manufacturing companies in the city of Palembang. The data obtained through questionnaires were 38 questionnaires that can be analyzed. Analysis of data using multiple linear analysis methods. Data were tested using the program SPSS 16.0. Techniques of data analysis in this study consisted of testing the quality of the data (validity and reliability testing), testing the assumption of classical (test of normality, multicollinearity test, test heterokedastisitas) and hypothesis testing. The results of testing the hypothesis that the first hypothesis is rejected which means that the leadership style no significant effect on managerial performance. The second hypothesis is rejected which would mean the quality of management information had no significant effect on managerial performance.

Keywords: Leadership Style, Quality of Management Information, Managerial Performance
