

ABSTRACT

CIVIC CENTER

Civic Center is a recreation area and government of the city of Palembang. Civic Center consists of several facilities, namely a multipurpose building, concert venue, parking building, Ampera building and also a city park. All of these facilities are accommodated in four building masses. The construction of Civic Center has several benefits, including accommodating the recreational activities of the people of Palembang, becoming a recreational facility for concert venues, both for local and foreign visitors, as well as the function of a multipurpose building to conduct meetings, weddings or others and also the people of Palembang see the beautiful scenery of the city of Palembang from a height through the Ampera building which has a height of eight floors. In addition, the presence of Civic Center in the city of Palembang can also be a heterogeneous unifying identity of the Palembang community. The theme applied in the design of Civic Center is "Togetherness" which can create a gathering place for the people of Palembang city with various existing facilities. This theme is manifested in buildings through a modern form with modern architectural styles.
