The Correlation between Nurses' Work Motivation and Nurses' Care Attitude based on the Values of Charitas Spirituality at Joseph Ward of Charitas Roman Catholic Hospital

THESIS

NURSING SCIENCE STUDY PROGRAM

FACULTY OF HEALTH SCIENCE

MUSI CHARITAS CATHOLIC UNIVERSITY

(Key Words : Work Motivation, Care Attitude)

(lxi 61 pages + 13 tables + 2 diagrams + 8 appendices)

Background : Motivation is the psychological character of humans that contribute toward a person's commitment level. This includes factors that cause, channel and endure a person's attitude toward a certain drive. Motivation derives from the word motive which means stimulation, encouragement, or energy that belongs to humans showing specific attitudes.

Aim : This study aims to investigate whether there is a correlation between nurses' work motivation and nurses' care attitude based on the values of Charitas Spirituality at Joseph Ward of Charitas Roman Catholic Hospital, Palembang in the year of 2017.

Method : This research applies analytical survey method using cross sectional approach and Chi-Square test. The sample is sixty nurses. The sampling technique is total sampling.

Result : The result of this research indicates that the p value of statistic bivariate test is $0.021 \leq \alpha 0.05$. Hence, it can be concluded that H_a is accepted and H_o is rejected. This means that there is a significant correlation between nurses' work motivation and nurses' care attitude based on the values of Charitas spirituality at Joseph Ward of Charitas Roman Catholic Hospital, Palembang in the year of 2017.

Suggestion : It is expected that all the investigators at Joseph Ward of Charitas Roman Catholic Hospital will continue to improve and motivate the work and service actions by prioritizing the caring behavior of each patient.
