Android is an operating system for mobile devices that includes a Linux-based operating system. As the needs of the mobility of mobile device users, would want to give a solution that can help their routines. In support of existing routines in the Library of the Catholic University of Charity Musi certainly want to create a system that can provide a convenience for the continuation of the activities that are taking place. The system has been used this library can not minimize the delay in student / student in returning books. Due to the new students who wish to borrow books being they need to complete college assignments or lectures while other students were borrowers the book have not also mengembalikanya Thus the need for an application that is able to remind the student / student will refund the book. The results of this research is a reminder build applications that can provide information when returning books in the library of the Univeristas Katolik Musi Charitas.

Keyword: Android, Loan Book, Reminder.
