ABSTRACT

From the results of the practical work carried out, the author proposes to design a data collection system for the LP recap of Subdit 2 Harda Distreskrim UM South Sumatra Police Palembang. From this problem the author provides ideas or input to help the office admin in recording the annual LP recap, namely "Designing a Website-Based LP Recap Data Collection System at SUBDIT II HARDA DIT RESKRIM UM POLDA SUMSEL". This design uses the Prototype method. Then in this design also proposes several design designs, namely Flowchart, and System Interface using the FIGMA design application.

Keywords: Prototype, Flowchart, Figma
